

## Anti-Acid Amigos!

The **Anti-Acid Amigos** (from QwikProducts®) are a potent combination in the battle against HVAC system acid. Acid is a major problem in any system causing premature breakdown of system components and ultimately, system failure.

QwikProducts™ provides a three-tiered approach to dealing with acid:

- ▶ Use QwikCheck® to quickly sample system purity and know within 2-seconds if acid is present,
- ▶ If acid is present, inject QwikShot® **Acid Flush** (without opening the system) to bind to it and move it from the system to the filter-drier where it can be safely removed,
- ▶ If a compressor burnout has occurred, Qwik **System Flush**® removes more, acid, oil and moisture than any other flush available!

### 1 Find acid fast...

### 2 Round up acid, move acid out...

### 3 Flush acid, oil, & moisture out.
